

MEDICAL APPLICATION
SYRINGE PLUNGER SYSTEM

This is one system of a three system project built by Performance Feeders, Inc. for a syringe assembly system. Due to the sensitivity of this product, the inset photo represents similar parts to the ones actually fed. The following are specifications we commonly meet for these types of applications:

- Dual Line System
- CE Certified Electrical Components
- 60 – 80 Parts Per Minute
- Custom Leveling Pads
- Hand Polished Vibratory Feeder Bowl
- Belt Driven Auxiliary Hopper
- FDA White Polyarmor Coating
